

AEONOX

Scratch-Resistant Powder Coat Technology

AEONOX™ is FMI's standard range of colours adopting breakthrough, tough, scratch-resistant powder coat technology with added protection for aluminium surfaces.

NE XT

WINDOWS & DOORS

ECO FRIENDLY

AEONOX™ is robust and allows for significant reduction of waste throughout the manufacturing process in our powder coating factory.

Packaging materials are also reduced for transportation, making it one of the lowest ecological footprints compared to other coating alternatives.

FAMILY FRIENDLY

The exceptional scratch resistant formula of AEONOX™ is ideal for use in high-wear areas where children or pets may play. With a 15 year Interpon warranty* and tough texture finish, AEONOX™ ticks all the boxes for homes requiring minimal upkeep and guaranteed reassurance.

SMOOTH INSTALLATION

AEONOX™ significantly lowers the risk of damage occurring throughout the installation process that often comes from tools and equipment rubbing against the joinery.

ARCHITECTURAL PERFORMANCE

AEONOX™ offers architects and their clients peace of mind because this is top of the line technology with minimal chance of damage, particularly for projects where larger windows are a part of the design. AEONOX™ can also be specified in all climate zones and on any building location and height, including sea level, to provide ease of specification for project designs of a larger scale.

SEAMLESS MANUFACTURING AND DELIVERY

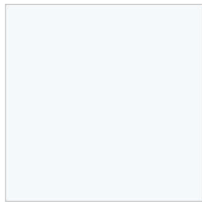

AEONOX™ has a fine texture finish that minimises chances of damage throughout fabrication in the factory and also allows for safer deliveries, even with reduced packaging.

CARE & MAINTENANCE

Please refer to our official care and maintenance guide available on nextwindows.co.nz to learn more about how to clean and care for your joinery. Remember, aluminium joinery is **low** maintenance, not **no** maintenance.

Please note AEONOX™ is not available in a gloss finish.

Colours are a guide only; due to the nature of the printing process some degree of colour and gloss level variation may occur. We recommend that you use production line colour swatches for final colour selection and approval.

*For detailed AEONOX™ colour and film integrity information, visit <http://www.specifyinterpon.co.nz/products/d1010/>

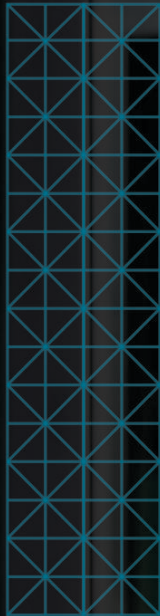

**Test results provided by Akzonobel. Based on D1010 AEONOX™ Black GN305A #SM5328AM, D1010 Black Satin GN150A #SM5331AM, & D1010 Custom Black Matt GN248A #TA5770AM, as per internal testing.

AEONOX

Scratch-Resistant Powder Coat Technology

AEONOX™ advanced formulation minimises the risk of aluminium profiles becoming damaged throughout the manufacturing and installation process, and reduces abrasions from the wear and tear of everyday living.

This is FMI's toughest powder coat on the market to date and promises to stand the test of time. AEONOX™ offers reassurance that any new installation to the home will ensure a seamless process and an deliver an exceptional end result.
